

Senior Post-Doctoral Position INGM – Genome Biology Laboratory (Ref: GB-1)

Job application

A Senior Post-Doctoral position is available in the Genome Biology Laboratory of INGM, led by Beatrice Bodega (https://ingm.org/en/bodega_lab_eng/). The successful candidate will work in a multi-disciplinary team focused on the identification of the function of Transposable elements in tumor microenvironments for early onset colon rectal cancer.

Required Qualifications and Experience

We are looking for highly motivated and talented candidates holding a PhD in life sciences and at least 3 years of research experience in distinguished laboratories in the field of genomics and tumor biology. Essential additional requirements are a deep knowledge of next generation sequencing techniques, CRISPR/Cas9 approaches and previous experience in cell biology and biochemistry.

The ideal candidate should be a hard-working, highly motivated and independent researcher, with an outstanding capability to work within an interdisciplinary team. Good communication skills and excellent knowledge of the English language are required.

Salary will be commensurate with experience.

Application Instructions

Please send your Curriculum Vitae to humanresources@ingm.org.
