PERSONAL PROFILE

I am attracted by a genuine interest for Research which has grown more and more after my 10 month internship in India. I strongly believe I would be a great investment due to my positive mindset and the fact that I have developed a strong ability to work in a team with my 5 year experience as a Scout Chief. During my internship, I have given proof of being a fast learner and a very hard worker. I am really interested in working abroad or in multicultural environments.
