

## **Post-Doctoral Position INGM – Human Immunology Laboratory (Ref: HUMIMM-3)**

### **Job application**

A Post-Doctoral position is available in the Human Immunology Laboratory led by Prof. Antonio Lanzavecchia (<https://ingm.org/en/lanzavecchia-lab-antonio-lanzavecchia/>) at INGM. The successful candidate will work in a multidisciplinary team focused on the human adaptive immune response to infectious diseases, vaccine and tumors. In particular, the project will focus on new approaches to genetically engineer primary lymphocytes to improve their function and to dissect basic aspects of their biology.

### **Required Qualifications and Experience**

We are looking for highly motivated and talented candidates holding a PhD in life sciences and at least 3 years of research experience in the field of molecular biology and immunology. Essential additional requirements are a deep knowledge of transfections systems, and CRISPR/Cas9 genome engineering, as well as experience in cell culture and molecular biology.

### **The ideal candidate:**

The ideal candidate should be a hard-working, highly motivated and independent researcher, with an outstanding capability to work within an interdisciplinary team. Good communication skills and excellent knowledge of the English language are required.

Salary will be commensurate with experience.
